THE NEW GENERATION OF ROLLATORS!

Increased safety, flexibility and the best possible comfort

Its predecessor TOPRO Troja Classic revolutionised the rollator market in 2002. Since then the TOPRO product development team have developed a rollator based on research and feedback from users and therapists. The result was a 2nd generation TOPRO TROJA with several user friendly features and a strong focus on extra security, flexibility and comfort.

INNOVATIVE!

Maximising user friendliness with various new functions

1 TOPRO IBS

A new developed interior braking system, which brakes on the rim instead of the surface of the wheel. This will make it possible to offer different tyres with a variety of tread patterns and softness, for different foundations.

2 TOPRO Quick Release

Easy to exchange or take off the wheels. Choose between:

3 Comfort Wheels Soft (PUR)

Comfortable and secure on unsurfaced roads, cobblestones etc.

4 Comfort Wheels Grip (TPE)

Manoeuvrable with good grip on smooth surfaces like flooring and tarmac.

5 TOPRO Offroad Wheels (accessory)

For rugged terrain.

6 TOPRO Ergo Grip

Unique ergonomic grip that makes it easier to stand from a sitting position. Provides a comfortable armrest and offers different holding positions when standing and resting.

7 TOPRO Bell

Attract attention when necessary. Easy to use without having to take your hands off the handles.

8 TOPRO Shopping Bag or Net Basket

Both hold up to 10 kg and are detachable. The shopping bag includes a shoulder strap for easy handling. It has two pockets inside for small personal belongings and a lid to protect your items.

9 Reflective Panels

Be visible from all sides in the dark. The 3M Scotchlite Reflective panels increase safety.

In addition are the original features kept:

- Light weight.
- Memory function for easy height adjustment of the handles.
- Tilt function and edge guard for safe and easy manoeuvring.
- Easy to fold.
- Stays firmly on its wheels when folded and takes little space.
- Tested and approved according to EN ISO 11199.
- Biocompatibility tested according to EN ISO 10993-5.

The model on this page is TOPRO TROJA 2G Premium.

The experts say this about the new handle Ergo Grip:

Yasko Hupfauer
Physiotherapist at the
University and rehabilitation
clinic in Ulm, Germany

"Patients with deformities in their hands can hold the rollator easier. The user walks WITHIN the rollator, not behind. The material of the grip is comfortable and provides good grip. By placing your hands on the top flat part of the Ergo Grip you will achieve an equilibrium reaction in the body."

Fabian Crüwell
Physiotherapist and therapy
manager at Special Hospital
Neresheim, Germany

"It gives a number of grip options. The grip requires more tension in the upper body, which is good for the patient. Rising up is easier, because you can support yourself better with this grip."

Nora Kern
NOI and Bobath
instructor,
Germany

"Sitting on the walker is more comfortable, since the arms can easily rest on the Ergo Grip."
