USER WEIGHT kg
 Crash tested and passed without tie down brackets

PLEASE CHOOSE ONE OF THE FOLLOWING FRAME OPTIONS

Helium Generation 2013
 Maximum user weight 125kg

Base price £2295

HUM030017
Helium Pro
 Maximum user weight 125kg
Fixed welded axle position
 (no rear seat height adjustment & +/- 1cm centre of gravity adjustment)
Standard angle adjustable back

£335

HUM030016
Helium Pro
 Maximum user weight 100kg
Fixed welded axle position
 (no rear seat height adjustment & +/- 1cm centre of gravity adjustment)
Fixed welded backrest set at*

-4° (86°)
 -2° (88°)
 0° (90°) £448
 +2° (92°) Figures in brackets are angle to ground
 +4° (94°)

*Must choose Oval Shaped Backrest

CLIENT MEASUREMENT

Seat width in cm (measured from outside frame tube to outside frame tube)

		32	34	36	38	40	42	44	46

Total Price													

Please follow this measuring method:

The following method is recommended on the basis of extensive practical experience. Deviations are possible in individual instances.

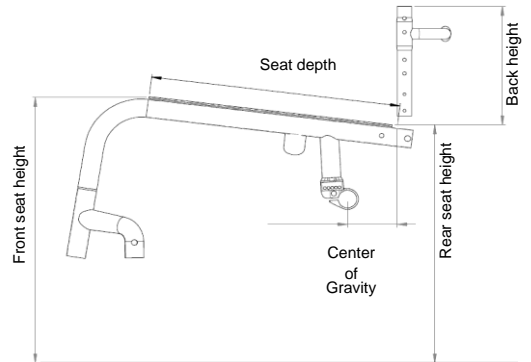

Seat width (SW):

- a) *For the user:* Allow space between sideguard and hip on each side of the chair (approx. 1 - 2cm altogether)
- b) *On the wheelchair:* From outside frame tube to outside frame tube.

Seat depth (SD):

- a) *For the user:* When sitting upright: leave space for 2 - 3 fingers between front edge of the seat upholstery and back of knee (approx. 3 - 6 cm). Care must be taken with adj. upholstery.
- b) *On the wheelchair:* From back tube to front of seat upholstery.

Front seat height:

- a) *For the user:* When sitting with 90° kneeangle: From back of knee to bottom of shoe sole.
- b) *On the wheelchair:* From front of seat tube to the ground . (min. 3cm longer than user measurement) Remember to include the cushion height.

Rear seat height:

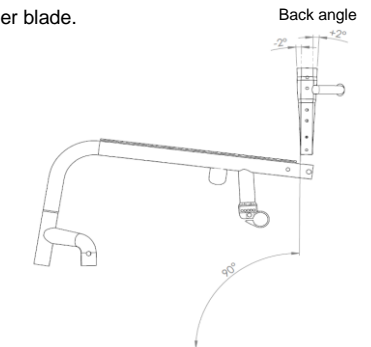

- b) *On the wheelchair:* From back of seat tube to the ground. **Note:** Max. seat height difference rear to front is 13 cm

Back height:

- a) *For the user:* From the seat, including cushion, to be no more than 1 - 2 cm below the lower shoulder blade.
- b) *On the wheelchair:* From back of seat tube to upper edge of backrest upholstery. **Note:** The user's ability to sit upright has a major influence on the back height and it can therefore differ considerably

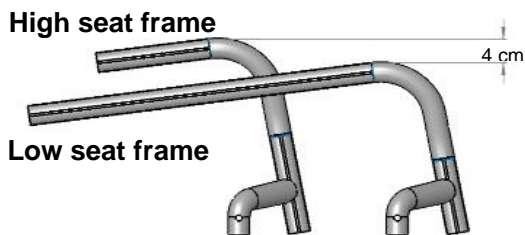

Back angle:

Important: The back height depends on the degree of disability. 0° is the angle 90° to the seat. Negative angles are <90° and positive angles are >90°.

Low Seat Frame vs. High Seat Frame:

The high frame is 4 cm higher than the low frame. So you can choose shorter and lighter forks to minimize the weight of your wheelchair.

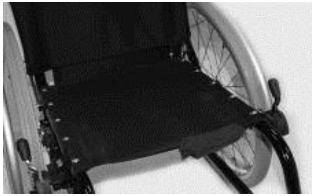

Technical Data Overview:

Overall width:	Overall width with:	24" rear wheel	25" rear wheel
Overall width:	For 0° camber:	SW + 17 cm	SW + 17 cm
Max overall height	For 3° camber:	SW + 23 cm	SW + 24 cm
Max overall length	For 6° camber:	SW + 29 cm	SW + 30 cm

Please note that the matrix is based on a std configuration:
Std chair 40 x 40 cm; 3° camber; 5,60 cm CoG; Seat angle of 8°
 All changes in the configuration might change the seat heights.
 Manufacturing tolerances of +/- 1 cm
